## DEVELOPMENT THROUGH CHANGE

helps organisations, teams and individuals to improve their performance by establishing not just **what** needs to change and **why**, but **how** the changes need to be effected.

## DEVELOPMENT THROUGH CHANGE

works with organisations to identify their vision for the future and to help bring that vision into reality.

One of the hallmarks of the organisation's reputation with clients, is its ability to transfer skills to the client's team throughout the implementation process.

As Principal Consultant, Brian Perry brings a wealth of experience to organisational change and people development. He is comfortable operating effectively at all levels of private and public sector businesses, regardless of their size.

He understands and appreciates that satisfying a vision can only be achieved by effective leadership and people management. Brian has had considerable experience of helping organisations, teams and individuals to fulfil their potential and take greater control of their development.

He utilises a significant range of feedback tools and development activities and is accredited to use a wide range of psychometric tests.
